# 2013 OIL & GAS ANNUAL REPORT

	Table of Content	
1	REMARKS FROM DIRECTOR OF PETROLEUM RESOURCES	Page 6
2	REGULATORY STRUCTURE OF THE NIGERIAN OIL AND GAS INDUSTRY	Page 6
3	MAKING MODULAR (MINI) REFINERIES WORK	Page 6
4	STATISTICAL DATA	Page 6
4.1	UPSTREAM	Page 6
4.11	Concessions	Page 6
4 .1 2	Field Exploration Activities	Page 15
4 .1 3	Field Development Activities	Page 16
4 .1 4	Rig Activities	Page 17
4 .1 5	Stabilized Crude / Condensate Volumes by Stream	Page 20
4.16	Reserves	Page 21
4 .1 7	Production Fields	Page 50
4.2	MIDSTREAM	Page 30
4 .2 1	Refinery Activities	Page 28
4 .2 2	Nigerian Crude / Condensate Export	Page 30
4 .2 3	Lubricant Blending Plants	Page 30
4 .2 4	Gas Supply Infrastructures	Page 32
4 .2 5	Petrochemicals	Page 32
4 .2 6	National Gas Requirement	Page 50

	т	able of Content
4.3	DOWNSTREAM	Page 32
4.31	Summary of Refinery Products	Page 32
4 .3 2	Retail Outlets	Page 39
4.33	LPG Penetration	Page 40
4.34	Petroleum Products Average Pricing	Page 41
4.4	HEALTH, SAFETY AND ENVIRONMENT	Page 41
4.41	Accident Report	Page 41
4 .4 2	Spill Incidence Report	Page 45
4.5	REVENUE PERFORMANCE	Page 49
4 .5 1	Revenue	Page 49

# 1. REMARKS FROM DIRECTOR OF PETROLEUM RESOURCES

Globally, energy discourses in many fora have centred on energy security, sustainability, climate change and impact of global oil markets on developing countries: producers and consumers alike. Recently, the Federal Government of Nigeria reiterated its commitment to resolving its energy challenges and harnessing the potentials toward energy prosperity for her citizenry. This is to ensure that Nigeria remains a competitive supplier of energy as it strives to deepen its energy utilization and domestication to facilitate economic diversification to other sectors.

This year's Nigeria Annual Oil and Gas Industry Report (NOGIAR) contains expository data detailing the activities across the oil and gas value chain in the period under review. The upstream industry performance is seen to be steady with marginal improvement. The aggregate hydrocarbon reserves are about 37 billion barrels of oil and condensate while 199 trillion cubic feet for gas reserves. This is an increase of about 0.08% and 0.85% year-on-year (y-o-y) respectively. Contractual arrangements account for about 23% of the nation's hydrocarbon reserves, while Joint Venture (JV) arrangements account for approximately 62% of the aggregate concessionary reserves. Interestingly, 45% of Nigeria's aggregate reserves resides in the offshore terrain while about 26% are on land. Swampy terrain accounts for the remaining 29%.

In the period under review, production capacity marginally increased by 3% (y-o-y) to an average 754 million barrels of oil in 2018. In the last 5 years, contractual arrangements production capacity has steadily increased, averaging 3% growth, to account for about 35% of total production. JV arrangements contributed about 52% of aggregate production in the preceding year. This is an average 3.5% decline over the last 5 years. Non-International Oil Companies' production capacity accounts for about one-eighth of aggregate production. This is an 8.6% and 1.9% asset growth in the last 5 years for Independent and Marginal field producers, respectively. The depletion and reserves replacement rate y-o-y averaged 2.04% and 4.00% respectively. Currently, the reserves life index stands at about 49 years.

Gas reserves has been on the incline from 2013 and is projected to continue to grow at a conservative rate of about 1.0%. In the review period, gas development picked up to six (6) NAG development plans from 2 NAG development plans in 2017. This is attributable to growing commitments to gas projects. The Domestic Supply Obligation (DSO) performance was about 48.0%. The national gas capacity performance for 2018 was about 80.0% with an average of 1.3 BSCF/D gas delivery to the domestic market.

Overall, gas utilization in the country for 2018 shows the export market accounting for 41%, field/plant use accounts for 31%, domestic market is about 17% and flare gas is about 11%. The zero routine gas flaring target in 2020 is vigorously being pursued by the Department. The impact of regulatory instruments such as Flare Gas (Prevention of Waste and Pollution) Regulations 2018 would undoubtedly facilitate the attainment of the zero flare elimination target and improve gas utilization in the coming years. The Department continues to drive the on-going implementation of the Nigerian Gas Transportation Network Code (NGTNC). The review of the Network Code licensing framework and development of all its ancillary agreements have been firmed preparatory to formal launch in 2019.

Gas utilization is being deepened by increasing liquefied petroleum gas (LPG) penetration. LPG consumption increased by about 16.0% year on year. A total of 364 LPG plant licenses and approvals were issued in 2018. This is expected to give about 15.0% rise in the nation's LPG consumption based on storage capacity. Safety and environmental compliance performance in the review year shows a declining path. Incidents and fatal accidents are mainly due to petroleum tanker truck accident and gas plant explosions.

In conclusion, this annual report is put together to acquaint our stakeholders with relevant reliable data on the 2018 operations of the Nigerian oil and gas industry, with a little more focus on the near virgin but attractive midstream sector. The data in the NOGIAR report would aid investors in making informed decisions on the Nigeria oil and gas industry investment opportunities. It would also provide researchers, academia and planners with updated knowledge and information on the developments in the industry. The Department would continue in its transparency commitment in providing reliable and high-quality data to the public. It is our hope that this edition would enrich policies, plans and studies on the industry thereby facilitating value creation and addition to all stakeholders.

### 2. REGULATORY STRUCTURE OF THE NIGERIAN OIL AND GAS INDUSTRY

Figure 1: The Nigeria Oil and Gas Industry

Department of Petroleum Resources is the regulatory agency of the oil and gas industry in Nigeria. Specifically, the roles of the Department includes-

- 1. Conservation of Nigeria's Hydrocarbon Resources
- 2. Regulation and Monitoring of industry activities to ensure compliance with best standards & practices
- ${\it 3.} \quad \hbox{Ensure safe, and environmentally sustainable development of the oil and gas operations' activities}$
- 4. Maintenance and administration of the national repository for archiving and retrieval of oil and gas data
- 5. Administration & management of acreages and concessions
- 6. Implementation of all government policies

## 3. MAKING MODULAR (MINI) REFINERIES WORK

In the face of dependency on importation for petroleum products availability, attempts by the Nigerian Government to encourage local private investments in refining of crude oil in the past had yielded very low success. The present government has launched new initiatives to encourage establishment of modular (mini) refineries as a short-term solution to the product supply problem. A study of the modular (mini) refineriery project shows that it is a viable project even in the event of competing with mega refineries in the same market (though the margin may become very low under this situation). In order to meet government's aspiration of making Nigeria a crude oil refining hub, government has provided conducive environment and incentives to make mini (modular) refinery projects more attractive. This article evaluates the progress status in the establishment of modular refineries in Nigeria while identifying the major challenges being faced with recommended solutions.

Nigeria's four state-owned refineries with a plate capacity of 445,000 barrels per stream day have continued to perform far below capacity. Over eighty percent of the petroleum products consumed in Nigeria is imported'. The pump prices of these products except Automotive Gas Oil (Diesel) are subsidized by the government. It is believed that the Federal Government of Nigeria spends over 200 billion Naira every year to subsidized petroleum products. These monies would have been used to provide infrastructure or provide better quality education or health facilities. A conservative estimate suggests that 55 million barrels of petroleum products are consumed daily in Nigeria at the ratio of 35:12:8 for PMS, AGO and DPK respectively. Analysis also shows that at the current demand growth rate, we will need to process 750,000 barrels of crude per day to meet the nation's demand for petroleum product by 20201. There is currently a deficit 2.6 million barrels per stream day between demand and supply of petroleum products in Africa<sup>2</sup>.

Figure 2: Crude oil processed in Nigeria's refineries between 2008 and 2017

Figure 3:Comparison of the total crude processed to capacity of the nation's refineries (2008 - 2017)

In order to ensure regular supply of petroleum product for domestic consumption and provide veritable platforms for Nigerians and investors to take advantage of these opportunities, the Federal Government has launched some initiatives to support the establishment of private mini (modular) refineries. These initiatives include:

- i. The "7 Big Wins" Initiative (2015 2019). The initiative captured the short and medium-term priorities to grow Nigeria's Oil and Gas Industry. It proffers a roadmap for developing a stable and enabling oil and gas landscape with improved transparency, efficiency, stable investment climate, and a well-protected environment. The "Big Win 4" focuses on expansion of domestic refining capacity and rehabilitation of existing refineries.
- ii. The National Petroleum and Gas Policies. The National Gas Policy was approved by the Federal Executive Council on the 28<sup>th</sup> day of June 2017. This was followed immediately by the approval of the National Petroleum policy on the 19<sup>th</sup> day of July 2017. These policies provide the framework for creation of strong refining hub in Nigeria, divestment of government-owned refineries, co-location of brownfield refineries with existing refineries and construction of private refineries.

#### The Mini (Modular) Refinery Project:

A modular refinery is a prefabricated crude oil processing plant constructed on skid mounted surfaces, with each structure containing a portion of the entire refining process plant, with by interstitial piping to form an easily manageable process. Technically, a modular refinery could be either simple or complex, with capacity ranging from 100 bpsd to 10,000 bpsd. They are however not defined by size. They can be transported in modules across distances and put together at the location desired. The other advantages of modular refineries include short project completion time, relatively small overall project cost, provides quicker investment return, can be installed in small space and could be designed towards petroleum product need around its location.

Attempts to construct private refineries in Nigeria started in 1990 with the call for indigenous private participation in crude oil refining by the government. Between 1990 and 2000, the Department of Petroleum Resources received over 100 applications. From 2001 to 2007, the 3-Stage Licensing (License to Establish - LTE, Approval to Construct - ATC and License to Operate - LTO) process, which is still in use to date was adopted. About 105 applications were received during the period, leading to grant of 21 LTEs in 2002 and 17 ATCs in 2004. Between 2008 and 2011, focus was placed more on mini (modular) refineries. Nine (9) LTEs were granted and two plants were fabricated, but only the 1,000 bpsd capacity Niger Delta Petroleum Resources refinery at Ogbelle River State was commissioned. From 2012 to date, about 34 LTEs have been granted for mini (modular) refinery projects; six (6) of these companies have been granted ATCs and are at different levels of construction.

The success rate of establishment of mini(modular) refineries in Nigeria is low; only one modular refinery has been commissioned since 2008 out of about 43 LTEs issued. However, in the last two years, construction of 7,000 bpsd OPAC Refinery in Umusetti, Delta State and 10,000 bpsd Niger Delta Petroleum Resources Refinery expansion project in Ogbelle, Rivers State started off and are near completion owing to the implementation of government policies and the support from the Department of Petroleum Resources. A few other modular refinery projects, namely Edo Refinery, Ikpoba Okha; Petrolex Refinery, Ijebu Ode; African Refinery, Port Harcourt and Southfield Refinery, Ologbo have either completed detailed engineering, secured modules to relocate or the equipment are being fabricated at the manufacturers yard.

Using Bonny Light Crude as an example, If the buying of the crude and the selling of the products are done using international prevailing prices, it is possible to show that the operation of the plant is profitable using the RefTexas Yield / Profit calculator for a 10,000 bpsd mini(modular) topping refinery that processes Bonny Light crude oil into naphta, diesel and fuel oil.

Figure 4: Yield /Profit Calculation for a 10,000 bpsd mini refinery

#### Conclusion and Recommendations

Modular refinery is a profitable project, even in the event of mega refineries competing in the same market. Competition in the same market with mega refineries will only reduce the profit margin for the smaller plant based on economies of scale. The establishment of modular refineries is the short-term remedy for availability of petroleum products from local production in Nigeria and the government in the last few years have been providing conducive environment and support for the realization of establishment of modular refineries in Nigeria. The government has also approved total waiver (100%) on custom duties for modular refinery equipment imported for licensed modular refinery projects. These efforts by the government and the support from the Department of Petroleum Resources have changed the modular refinery projects landscape in the last two years. It is projected that at least five modular refineries with each processing up to 40,000 barrels of crude per day will be operational in Nigeria in the next five years.

The efforts of the government in providing conducive environment for establishment of modular refineries in Nigeria have been commendable. However, a lot more incentives can be put in place to realize government's aspiration of making Nigeria a refining hub in Africa. These incentives can take the form of establishing a special purpose vehicle (trust fund) to assist in funding modular refinery projects; providing tax holidays and foreign loan guarantees for modular refinery projects; and investing in power and road/rail infrastructure especially in areas where mini refinery licenses have been granted.

Major Upstream Projects

Table 34 : 2013 Status Of Major Active Field Development / Crude Oil Handling Facilities Projects

		Addition	Completion	
# Project	Company	Location (Mbopd)	Development Year Status	

1 Bonga Southwest (BSW) Aparo

2 Agbami Infill Drilling (AIDP) Detailed Engineering

#	Project	Company	Location	Addition (Mbopd)	Development	Completion Year	Status
3	Tapa Production Upgrade						Detailed Engineering
4	South Offshore Area Produced Water Project						
5	Dibi Complete Restoration						Detailed Engineering
6	Antan Well Head Platform						Detailed Engineering
7	FSO unity Cargo Tanks replacement						
8	Wash Tank 3 Replacement Project, Obogwu Flowstation						Detailed Engineering
9	OML 58 Condensate Spiking						
10	Alakiri Flow Station XHP Separator Installation/Commissioning						
11	Robertkiri Crude Oil Dehydration Capacity Expansion						
12	Ibot Satellite Fields Development Phase 2						Detailed Engineering
13	Idoho BP Restoration						Detailed Engineering
14	Usari Alternate Development						Detailed Engineering
15	Ubit PP Restoration						Installation/Construction
16	Debottlenecking and Upgrade of Egbaoma Flow station						
17	Otakikpo Field Early Production Facility						Installation/Construction
18	Further Oil Development Project – Phase 1						Installation/Construction
19	Facilities Modification of Existing 2-phase separator to 3-phase separator for in-field dehydration (IFD) system deployment on flowstations in OML 18						
20	OML 99 Ikike Field Development						Detailed Engineering
21	Anyala and Madu Fields OML 83/85						Detailed Engineering
22	Sapele further Oil Development Project.						
23	100,000bbl Crude Oil Buffer Storage Tank - OML 20 Egbema Fields						
24	Modifiaction of Oil Water Treatment Facility at Amenam Kpono						
25	Escravos Crude Oil Tank Repairs and Upgrade Project						
26	Crude Oil Storage Tank 5 Project						
27	Construction of 100KB Crude Oil Buffer Tank in Egbema Field	NPDC/SEPLAT					
28	Upgrade of Ebendo Flowstation Facility						
29	2Trains x 20,000BPD Otakikpo Flow station Production Facility Project.						
30	Tubu Field Development and Langley Upgrade.						
31	JV Skim Pile Upgrade Project						
32	JV Fibre Optics Project						
33	Eriemu 11T Surface Facility Equipment in Eriemu Field (OML 30)	NPDC/SEPLAT					
34	Replacement of Dehydration Tanks at Ogini Flowstation in OML 26	NPDC/SEPLAT					Detailed Engineering
35	Certification & Commissioning of Ocean Patriot as Accommodation Platform						Valid
36	Offshore Platform Planned to be used for re-entry of Ogedeh-1 Well.	BICTA ENERGY & MANAGEMENT SYSTEMS LIMITED					
37	20,000 barrels Crude Oil Storage Tank						
38	Revamp of Adanga Complex						
39	Gbetiokun Early Production Facility (EPF)	NPDC/SEPLAT					
40	`Preowei Deepwater Development Project						
41	Offshore Platform Project in Gulf of Guinea.						
42	1MM Barrels Onshore Crude Oil Storage Facility.						Detailed Engineering
43	Egwa Early Production Facility (EPF)	NPDC/SEPLAT					
44	Tank 8 DED approval package	CHEVRON NIGERIA LTD.					Detailed Engineering

# 5.0 GLOSSARY ITEMS

AG - Associated Gas
AGO - Automated Gas Oil
AR2 - African Regional Line
ATC-Approval to Construct
BPSD - Barrel per Stream Day
CB - Carbon Black

DGSO - Domestic Gas Supply Obligation

```
DPK - Dual Purpose Kerosene
DPR - Department of Petroleum Resources
EGP - Escravos Gas Plant
EOR - Enhanced Oil Recovery
FCT - Federal Capital Territory
FPSO - Floating Production Storage and Offloading
IDSL -Integrated Data Services Limited
IO – Indigenous Operator
IOC- International Oil Company
JV - Joint Venture
KM - Kilometer
KRPC - Kaduna Refinery & Petrochemical Company
LAB - Linear Alkvl Benzene
LLDPE - Linear Low Density Polyethylene
MF - Marginal Field
MMbbls - Million barrels
MMSCFD - Million Standard Cubic Feet per Day
MT – Metric Tonnes
NAG - Non-Associated Gas
NAOC - Nigerian Agip Oil Company
NAPIMS - National Petroleum Investment Management Services
NDPR - Niger Delta Petroleum Resources
NDRC - Niger Delta Regional Data Compilation
NGL - Natural Gas Liquid
NNPC - Nigerian National Petroleum Corporation
NPDC - Nigerian Petroleum Development Company
OML - Oil Mining Lease
OPEC – Organization of the Petroleum Exporting Countries
OPL - Oil Prospecting License
PE - Polyethylene
PERF - performance
PHRC - Port Harcourt Refining Company
PMS - Petroleum Motor Spirit
PP - Polypropylene
PPHP - Polypropylene Homo-Polymer
PPMC - Petroleum Product Marketing Company, a subsidiary of NNPC
PPT - Petroleum Profit Tax
PRF - Propylene-Rich Feed
PSC - Production Sharing Contract
SPDC - Shell Petroleum Development Company
SQ KM - Square Kilometer
SR - Sole Risk
TA - Technology Adaptation
TCF - Trillion Cubic Feet
```

TQ – Technology Qualification

WRPC - Warri Refining & Petrochemical Company
